

Performance Information for Appropriations

Vote Statistics

MINISTER(S) RESPONSIBLE FOR APPROPRIATIONS: Minister of Statistics (M67)

ADMINISTERING DEPARTMENT: Statistics New Zealand

MINISTER RESPONSIBLE FOR STATISTICS NEW ZEALAND: Minister of Statistics

Part 1 - Summary of the Vote

Part 1.1 - Overview of the Vote

The Minister of Statistics is responsible for appropriations in the Vote for the 2012/13 financial year. The Vote is made up of two appropriation types.

An Official Statistics - Multi Class Output Appropriation (MCOA) of \$109.443 million comprised of the following outputs:

- a total of \$18.210 million for Coordination of Government statistical activities
- a total of \$40.685 million for Economic and Business statistical information services, and
- a total of \$50.548 million for Population, Social and Labour Force statistical information services.

A 2013 Census of Population and Dwellings Multi-Year Appropriation (MYA) of \$72.045 million established from 1 October 2011 to provide for flexibility in conducting the 2013 Census. In 2012/13, \$53.700 million has been budgeted to be spent.

Details of these appropriations are set out in Parts 2-6 below.

Part 1.2 - High-Level Objectives of the Vote

The Government aims to grow the New Zealand economy so that New Zealanders can enjoy greater prosperity, security and opportunity. To achieve this it has identified four Government priorities: responsibly manage Government finances; build a more competitive and productive economy; deliver better public services to New Zealanders; and, rebuild Christchurch. Activity under Vote Statistics contributes to this priority by providing key 'results measures' for government initiatives to build a more competitive and productive economy. Statistics will be used by government, business, the public, Māori and local authorities to inform decisions and measure economic, environmental and social performance.

Statistics New Zealand's multiple roles as sector leader, major producer of the country's official statistics and official reporter on New Zealand's progress give rise to opportunities to provide leadership and expertise in measuring policy impacts and public sector performance.

Official Statistics System, funded through Vote Statistics, aims to foster a society in which official statistics are used to inform policy decisions, and monitor and understand the state and progress of New Zealand.

Government Priorities and Outcomes - Links to Appropriations

Government Priorities	Government Outcomes	Appropriations
Responsibly manage Government finances	Maximise the benefits from Government's investment in official statistics (Minister of Statistics' priorities letter December 2011)	Official Statistics Multi-Class Output Appropriation (M67)
Responsibly manage Government finances	Finalise an agreed list of New Zealand's most important (Tier 1) statistics (Minister of Statistics' priorities letter December 2011)	Official Statistics Multi-Class Output Appropriation (M67)
Build a more competitive and productive economy	Building stakeholder confidence in key statistics (Minister of Statistics' priorities letter December 2011)	Official Statistics Multi-Class Output Appropriation (M67)
Build a more competitive and productive economy	Improve access to government-held data (Minister of Statistics' priorities letter December 2011)	Official Statistics Multi-Class Output Appropriation (M67)
Build a more competitive and productive economy	Plan and deliver the 2013 Census of Population and Dwellings (Minister of Statistics' priorities letter December 2011)	2013 Census of Population and Dwellings Multi-Year Appropriation (M67)
Deliver better public services to New Zealanders	Successful implementation of the Statistics 2020 Te Kāpehu Whetū transformation programme (Minister of Statistics' priorities letter December 2011)	Official Statistics Multi-Class Output Appropriation (M67)
Deliver better public services to New Zealanders	Advance options for the future of population and social statistics including the census (Minister of Statistics' priorities letter December 2011)	Official Statistics Multi-Class Output Appropriation (M67)
Rebuild Christchurch	Reinstate Statistics New Zealand's Christchurch operations (Minister of Statistics' priorities letter December 2011)	Official Statistics Multi-Class Output Appropriation (M67)

Government's long-term priorities for Vote Statistics aim to maximise the benefits from Government's investment in official statistics. For this to happen: the right information needs to be being produced, and available to users in a way to best meet their needs; the information needs to have the confidence of users to ensure it is used in decision-making by central and local government, the public, Māori and businesses; the costs to businesses and households must be minimised; and the statistical system must provide value for money. The Government's priorities, and the Vote Statistics appropriations that will progress these, are detailed in the table above.

For further information on the high-level objectives of the Vote, please see the Statement of Intent for Statistics New Zealand.

Part 1.3 - Trends in the Vote

Summary of Financial Activity

	2007/08	2008/09	2009/10	2010/11	2011/12		2012/13			2013/14	2014/15	2015/16

Continuation of The New Zealand Population and Social Statistics Programme	Official Statistics MCOA (M67) Departmental Output Expense	-	(1,997)	(1,177)	2,192	9,052

Analysis of Significant Trends

The fluctuation in the appropriation level for Statistics New Zealand is largely due to the cyclical nature of some of its survey activities and changes in new initiative funding. In the year the Census of Population and Dwellings is conducted, the costs rise significantly, due to expenditure on wages for enumerators and other temporary processing costs.

The Census of Population and Dwellings due to be held in March 2011 was deferred due to the Christchurch earthquake on 22 February 2011. Due to contractual obligations, the majority of the 2010/11 budgeted costs for the 2011 Census of Population and Dwellings were still incurred.

In 2012/13, Statistics New Zealand's total appropriations will increase by \$51.065 million compared to the 2011/12 Budgeted. This is predominately due to the increase in 2013 Census of Population and Dwellings MYA in order to carry out the Census on 5 March 2013.

In terms of initiatives under the current government, there are two programmes:

- Statistics 2020 Te Kāpehu Whetū: Achieving the Statistical System of the Future, is a 10 year strategy and programme of work to deliver more value from official statistics, address key risks to the ongoing supply of relevant and accurate statistics, and create a more efficient and sustainable way of working.
- Continuation of The New Zealand Population and Social Statistics Programme, is a continuation of the current time-limited component of the New Zealand population and social statistics programme. This programme will sustain delivery of the most important elements that form part of the programme and support completion of modernisation measures to improve production efficiency and reduce compliance costs.

Statistics New Zealand also receives third-party revenue. The revenue generated is dependent on the demand for statistics by third-parties (individuals and companies) and other government departments to run specialised surveys. Contract surveys run for third-parties are fiscally neutral to Statistics New Zealand, as the additional revenue generated is offset by a corresponding increase in expenditure necessary to run the survey.

Part 2 - Details and Expected Performance for Output Expenses

Part 2.1 - Departmental Output Expenses

Intended Impacts, Outcomes and Objectives

Intended Impacts, Outcomes or Objectives of Appropriations	Appropriations
Outcome: An Informed Society using Official Statistics Impact: New Zealand increasingly gets the information it needs to grow and prosper	2013 Census of Populations and Dwellings (MYA)
Outcome: An Informed Society using Official Statistics Impact: New Zealand increasingly gets the information it needs to grow and prosper	Official Statistics (MCOA)

For further information on the intended impacts, outcomes and objectives of the departmental output expense appropriations please see the Statement of Intent for Statistics New Zealand.

2013 Census of Population and Dwellings (M67)

Scope of Appropriation and Expenses

Type, Title, Scope and Period of Appropriations	Appropriations, Adjustments and Use	\$000
<i>2013 Census of Population and Dwellings (M67)</i>	Original Appropriation	72,045
This appropriation is limited to conducting the 2013 Census, and the administration and management of the on-going census programme, as required under the Statistics Act 1975. Commences: 1 October 2011 Expires: 30 June 2015	Adjustments to 2010/11	-
	Adjustments for 2011/12	-
	Adjusted Appropriation	72,045
	Actual to 2010/11 Year End	-
	Estimated Actual for 2011/12	7,194
	Estimated Actual for 2012/13	53,700
	Estimated Appropriation Remaining	11,151

Revenue

	Budget \$000
Revenue from the Crown to end of 2012/13	60,894
Revenue from Others to end of 2012/13	-
Total Revenue	60,894

Reasons for Change in Appropriation

This appropriation was established from 1 October 2011, to enable a 2013 Census to be taken, following the decision to defer the 2011 Census.

The total cost of conducting the 2013 Census also includes \$1.541 million charged to the Multi Class Output Appropriation under the Population, Social and Labour Force Statistical Information Services Output Class, which represents the costs incurred by the 2013 Census from 1 July 2011 to 30 September 2011, prior to the establishment of a separate Multi Year Appropriation for the 2013 Census.

The planning and delivery of the Census of Population and Dwellings is normally phased over a five-year cycle. The cycle for the 2013 Census differs due to it following directly on from the deferred 2011 Census. Much of the preparation work for the deferred census has been able to be reused (for example, no further dress rehearsal was required, and some contracts were able to be rolled over).

In 2012/13, the main activity will be conducting the Census proper. The main measures of its success will be having a high proportion of residents in the country on the night counted by the census (ie, the coverage rate), and having a high proportion of residents return their completed form (ie, the response rate).

Output Performance Measures and Standards

Performance Measures	2011/12		2012/13
	Budgeted Standard	Estimated Actual Standard	Budget Standard
National coverage rate for the 2013 Census of Population and Dwellings	Not applicable in 2011/12 98% target coverage rate in 2005/06	Not applicable in 2011/12 98% coverage rate achieved in 2005/06	98% (see Note 1)
National response rate for the 2013 Census of Population and Dwellings	Not applicable in 2011/12 95% target coverage rate in 2005/06	Not applicable in 2011/12 94.8% response rate achieved in 2005/06	95%

Note 1 - International experience confirms that serious data quality issues emerge when the national coverage rate is below 98 percent.

Official Statistics MCOA (M67)

Scope of Appropriation

Coordination of Government Statistical Activities

Leadership of the OSS, including liaison with OSS partners, provision of ministerial services, statistical advice, and the operation of access channels.

Economic and Business Statistical Information Services

Delivery of statistical information services relating to business and the economy.

Population, Social and Labour Force Statistical Information Services

Delivery of statistical information services relating to the population, environment, household economics, social conditions, and the labour force.

Explanation for Use of Multi-Class Output Expense Appropriation

All three output classes contribute to the outcome of creating an informed society through official statistics.

Expenses and Revenue

	2011/12		2012/13
	Budgeted \$000	Estimated Actual \$000	Budget \$000
Total Appropriation	101,686	98,886	109,443
Coordination of Government Statistical Activities	15,955	15,507	18,210
Economic and Business Statistical Information Services	40,029	38,937	40,685
Population, Social and Labour Force Statistical Information Services	45,702	44,442	50,548
Revenue from Crown	92,173	92,173	101,430
Coordination of Government Statistical Activities	14,550	14,550	17,050
Economic and Business Statistical Information Services	35,571	35,571	36,775
Population, Social and Labour Force Statistical Information Services	42,052	42,052	47,605
Revenue from Other	9,513	9,513	8,013
Coordination of Government Statistical Activities	1,405	1,405	1,160
Economic and Business Statistical Information Services	4,457	4,457	3,909
Population, Social and Labour Force Statistical Information Services	3,651	3,651	2,944

Reasons for Change in Appropriation

A net increase in funding of \$7.757 million between 2011/12 Budgeted and 2012/13 Budget, with the main contributing factors being:

- increase in funding of \$4.300 million relating to the Statistics 2020 Te Kāpehu Whetū Programme
- net increase in funding of \$2 million in 2011/12, due to the change in the timing of Programme of Official Social Statistics expenditure as a result of the deferral of the 2011 Census
- transfer of \$1 million funding from 2011/12 to 2012/13 relating to the Statistics 2020 Te Kāpehu Whetū Programme; this accounts for \$2 million net increase in funding between years
- decrease in funding of \$1.500 due to Efficiency Savings relating to Superannuation funding reduction
- increase in funding of \$1.057 million relating to the Māori Social Survey
- decrease in funding of \$475,000 relating to the Migrant Levy Allocation and the Household Savings Survey for 2011/12, and
- increase in funding of \$342,000 relating to the Disability Survey.

Output Performance Measures and Standards

Performance Measures	2011/12		2012/13
	Budgeted Standard	Estimated Actual Standard	Budget Standard
Output Class 1: Coordination of Government Statistical Activities			
<i>Leadership of the Official Statistics System</i>			
The Official Statistics System programme is delivered, as agreed with the Minister in the Purchase and Performance Agreement, and as varied by agreement during the year. The programme includes policy advice, support to the Advisory Committee on Statistics (ACOS) and influencing Official Statistics System participants by developing system-wide strategies and planning, the health and performance of the system, and education and capability initiatives across the system.	Minister is 'satisfied' or 'very satisfied' (see Note 1) that 100% of policy advice meets the Quality Standards for Policy Advice (see Note 2) Chair of ACOS is satisfied' or 'very satisfied' with the level of support provided (see Note 3)	Standard met Standard met	Minister is 'satisfied' or 'very satisfied' (see Note 1) that 100% of policy advice meets the Quality Standards for Policy Advice (see Note 2) Chair of ACOS is satisfied' or 'very satisfied' with the level of support provided (see Note 3)
<i>Facilitation of awareness and use of statistical information (see Note 4)</i>			
Web based services provides people with: <ul style="list-style-type: none"> access to free information about all statistical collections (see Note 5) online tools to assist users to access the specific information they need (see Note 6). 	1,450,000 visits 160,000 visits	1,450,000 visits 180,000 visits	1,500,000 visits 170,000 visits
Assisted advisory services include: <ul style="list-style-type: none"> Responses to statistical requests for customised datasets, access to microdata, and confidentialised unit record files and responses to international questionnaires Free telephone and email enquiry service. Responses to statistical enquiries are provided within the timeliness standard and high quality services are provided (see Note 7).	2300 statistical requests 17,250 free enquiries 90% of free enquiry service queries responded to within 2 working days 80% of clients rate the service as 'very good' or 'excellent'	2100 statistical requests 13,522 free enquiries (see Note 8) 96% of free enquiry service queries responded to within 2 working days 98% of clients rate the service as 'very good' or 'excellent'	2100 statistical requests 14,000 free enquiries 90% of free enquiry service queries responded to within 2 working days 80% of clients rate the service as 'very good' or 'excellent'
Capability building services include: <ul style="list-style-type: none"> Providing outreach seminars, workshops and visits. 	200 visits 100% of clients report an increase in their confidence to use statistics	265 visits 100% of clients reported an increase in their confidence to use statistics	200 visits 100% of clients report an increase in their confidence to use statistics
Output Class 2: Population, Social and Labour Force Statistical Information Services			
Statistical releases (see Note 9) are free from such significant error that they require a public correction notice to be published. A significant error is one which affects a high priority output, may mislead economic or social policy decisions or commentary, or changes a headline figure or indicator.	87 statistical releases 99% free from significant error	98 statistical releases 99% free from significant error	91 statistical releases 99% free from significant error
Survey-based statistical releases meet their target response rates (see Note 10), as agreed with the Minister in the Purchase and Performance Agreement.	13 survey-based releases 100% meet target response rate	12 survey-based releases 79% of survey-based collections met target response rate	10 survey-based releases 100% meet target response rate
Statistical releases are published on the advertised date (see Note 11), as agreed with the Minister in the Purchase and Performance Agreement.	100% published on the advertised date	96% published on the advertised date (Note 12)	100% published on the advertised date

Performance Measures	2011/12		2012/13
	Budgeted Standard	Estimated Actual Standard	Budget Standard
Output Class 2: Population, Social and Labour Force Statistical Information Services - cont'd			
Users trust official statistics (see Note 13).	A majority of respondents trust a sample of official statistics	Standard met. 67% of respondents almost always trusted social and population statistics	A majority of respondents trust a sample of official statistics
Output Class 3: Economic and Business Statistical Information Services			
Statistical releases (see Note 9) are free from such significant error that they require a public correction notice to be published. A significant error is one which affects a high priority output, may mislead economic or social policy decisions or commentary, or changes a headline figure or indicator.	149 statistical releases 99% free from significant error	140 statistical releases 99% free from significant error	139 statistical releases 99% free from significant error
Survey-based statistical releases meet their target response rates (see Note 10), as agreed with the Minister in the Purchase and Performance Agreement.	73 survey-based releases 100% meet target response rate	82 survey-based releases 100% of survey-based collections met target response rate	80 survey-based releases 100% meet target response rate
Statistical releases are published on the advertised date (see Note 10), as agreed with the Minister in the Purchase and Performance Agreement.	100% published on the advertised date	96% published on the advertised date (Note 14)	100% published on the advertised date
Users trust official statistics (see Note 13).	A majority of respondents trust a sample of official statistics	Standard met. 69% and 61% of respondents almost always trusted CPI and GDP statistics respectively	A majority of respondents trust a sample of official statistics

Note 1 - The Minister's satisfaction with policy advice will be measured through a short survey. This survey will ask the Minister to rate his/her personal satisfaction (from 'very dissatisfied' to 'very satisfied') with policy advice provided to date. This survey will be administered orally and annually as agreed with the Minister. The estimated performance for 2011/12 is based on all policy advice papers being accepted by the Minister without requiring amendment plus informal feedback during officials' meetings.

Note 2 - Quality Standards for Policy Advice includes:

- Purpose: the aims of the paper have been clearly stated and they answer the questions set.
- Logic: the assumptions behind the advice are explicit, the argument is valid and supported by facts.
- Accuracy: the facts in the papers are accurate and all material facts have been included.
- Options: an adequate range of options has been presented and each is assessed for benefits, costs and consequences to the organisation/system/government and the community as appropriate.
- Consultation: there is evidence of adequate consultation with interested parties and possible objections to proposals have been identified.
- Practicality: the problems of implementation, technical feasibility, timing and consistency with other policies have been considered.
- Presentation: the format meets requirements, the material is effectively and concisely summarised, and is free from spelling or grammatical errors.

Note 3 - The Chair of the Advisory Committee on Statistics satisfaction with the support provided by Statistics New Zealand will be measured through a short survey annually.

Note 4 - The performance measures and standards for the Official Statistics multi-class output appropriation have been revised to provide an improved reflection of the services provided to the public to facilitate greater awareness and use of official statistics.

Note 5 - Estimate for the main Statistics New Zealand website only (www.stats.govt.nz). People looking for information on the 2013 Census will be directed to the stand alone www.census.govt.nz, which is also the portal for completing forms online.

Note 6 - Three online tools are included: Infoshare, Business Toolbox and Interactive Boundary Maps. They were promoted more heavily during 2011/12 than initially expected. The budget for 2012/13 has been lowered as Business Toolbox and Interactive Boundary Maps rely heavily on Census data and will continue to show 2006 Census data during 2012/13, as 2013 Census data is not expected until the December quarter 2013.

Note 7 - Client satisfaction is measured through a voluntary survey sent to clients after the requested service has been provided.

Note 8 - The number of free enquiries was lower than estimated due to the deferral of the 2011 Census, which was expected to generate a significant number of enquiries.

Note 9 - A release includes a media release and an information release onto the website, which occur at the same time. It includes the key statistical results, commentary on the analysis of the results, tables of data and technical notes to explain definitions and methods.

Note 10 - A target response rate is set for each survey that will ensure the results are within acceptable levels of accuracy. The performance standard is based on the number of surveys conducted.

Note 11 - A data release is timely if it is available to users within the period in which it remains useful. Planned timeliness is a design decision, based on trade-offs with accuracy, response rates and cost. The calendar of release dates for periodical statistical releases is published on the Statistics New Zealand website at least six months in advance, and the achievement of the planned release dates is monitored as a timeliness performance measure.

Note 12 - Of the five releases that did not meet timeliness standards, four were as a result of the on-going effect of the February 2011 earthquake.

Note 13 - A survey of the general public was carried out in 2010 and of Government Workers in 2011. The sample of statistics includes statistics on inflation (such as the Consumers Price Index), statistics on the national economy (such as Gross Domestic Product), (both from Business and Economic Output Class) and statistics on employment and unemployment (such as Household Labour Force statistics), and population statistics (such as statistics from the Census of Population and Dwellings). These latter two are included in Population, Social and Labour Force Output class. A rolling programme of surveys of other key client groups is being carried out over a three to four year period.

Note 14 - Of the seven releases that did not meet timeliness standards, two were as a result of the on-going effect of the February 2011 earthquake.

Current and Past Policy Initiatives

Policy Initiative	Year of First Impact	2011/12 Budgeted \$000	2012/13 Budget \$000	2013/14 Estimated \$000	2014/15 Estimated \$000	2015/16 Estimated \$000

Intended Impacts, Outcomes and Objectives

Intended Impacts, Outcomes or Objectives of Appropriations	Appropriations
Purchase of assets and funding of internally developed systems integral to the efficient and effective delivery of Statistics New Zealand's outputs.	Statistics New Zealand - Capital Expenditure PLA (M67)

Statistics New Zealand - Capital Expenditure PLA (M67)

Scope of Appropriation

This appropriation is limited to the purchase or development of assets by and for the use of the Statistics New Zealand, as authorised by section 24(1) of the Public Finance Act 1989.

Capital Expenditure

	2011/12		2012/13
	Budgeted \$000	Estimated Actual \$000	Budget \$000
Forests/Agricultural	-	-	-
Land	-	-	-
Property, Plant and Equipment	5,669	7,700	7,000
Intangibles	16,331	13,073	12,000
Other	-	-	-
Total Appropriation	22,000	20,773	19,000

Reasons for Change in Appropriation

Changes to the capital appropriations are due to the on-going programme of upgrade and replacement of Statistics New Zealand's capital assets.
