## Adjustments to the Summary of Financial Activity Table Due to Vote Restructuring

There have been no restructuring adjustments to prior year information in the Summary of Financial Activity table. This year's Summary of Financial Activity table shows the amounts transferred from the former Vote Canterbury Earthquake Recovery for the last three months of 2015/16 and subsequent financial years only.

### 1.3 - Analysis of Significant Trends

#### *Total Vote: All Appropriations*

The movements in Departmental and Non-Departmental appropriations in Vote Finance, as detailed in the Summary of Financial Activity table above, are largely due to movements in capital expenditure and debt servicing costs.

Significant movements within each appropriation category are shown below.

#### *Departmental Output Expenses*

2013/14 includes \$10 million associated with the final year of the Government Share Offer programme. This decrease was partially offset by a transfer of \$5.500 million into the Social Housing Reform Programme from the Ministry of Business, Innovation and Employment.

Shared Support Services to the Department of the Prime Minister and Cabinet (DPMC) have increased following the transfer of Emergency Management activities from the Department of Internal Affairs from April 2014 (\$4.300 million) and Canterbury Earthquake Recovery Authority activities from March 2016 (\$3 million).

2013/14 was also the first full year of operations of the Analysis for Outcomes programme (\$1.800 million), and the Gateway and Major Project Monitoring activities (\$2 million) that transferred from the State Services Commission (SSC) from 1 December 2013.

The output expenses for the Government Share Offer programme covered three financial years: \$6.600 million in 2011/12, \$10.300 million in 2012/13 and \$10 million in 2013/14.

Crown Company Monitoring Advice to the Minister for State-Owned Enterprises and Other Responsible Ministers appropriation increased by \$300,000 in 2015/16 and \$200,000 in 2016/17 for performance monitoring and governance advice of Ōtākaro Limited.

#### *Non-departmental Output Expenses*

The most significant increase was due to the establishment of a new appropriation during 2015/16, Management of Anchor Projects by Ōtākaro Limited, for the provision of operating costs to Ōtākaro Limited for managing the continuation of Anchor Projects and divestment of Crown-owned land in Christchurch. Funding of nearly \$7.500 million was approved for 2015/16 and \$23 million for 2016/17.

Tamaki Regeneration appropriation has been transferred into Vote Finance from Vote Building and Housing of slightly over \$3 million during 2015/16, with funding commencing in 2016/17.

2013/14 included over \$5 million of new funding for Inquiries and Research into Productivity-Related Matters. During 2014/15 this appropriation was restructured to a multi-category appropriation, and as a result the non-departmental output expenses significantly decreased in that year.

### *Non-Departmental Borrowing Expenses*

Debt servicing costs fluctuated between 2011/12 and 2014/15. These costs are expected to decrease for 2015/16 and then continue to fluctuate from 2016/17 onwards due to movements in forecast interest rates and the amount of debt outstanding.

### *Non-Departmental Other Expenses*

For the year 2016/17, the valuation of the Crown's unfunded liability under the Government Superannuation Scheme is expected to decrease by nearly \$86 million. The unwind of discount rate used in the present value calculation of payments under the Crown Support Deed with Southern Response Earthquake Services Limited is also expected to decrease by over \$8 million.

In 2015/16 the most significant changes were the write-off of historical investment in Solid Energy New Zealand Limited of \$60.900 million and the impairment of additional investment of \$250 million in Southern Response Earthquake Services Limited.

2014/15 included nearly \$108 million in respect of the indemnity provided to Solid Energy New Zealand Limited for the reimbursement of the rehabilitation costs associated with all existing mining operations. There was also \$684 million incurred for Crown's unfunded liability under the Government Superannuation Scheme and \$333 million for the impairment of the investment in Southern Response Earthquake Services Limited.

Significant items during 2013/14 included nearly \$614 million for the Crown's unfunded liability under the Government Superannuation Scheme, direct costs associated with the Mixed Ownership Model of nearly \$33 million, Loyalty Bonus Scheme related to Public Share Offer of slightly over \$22 million, the impairment of Redeemable Preference Shares in Solid Energy of \$25 million, and New Zealand Aluminium Smelters - Electricity Agreement Incentive payment of \$30 million.

### *Departmental Capital Expenditure*

As part of the Wellington Accommodation Strategy, the Treasury is currently planning a full leasehold refit in December 2019.

The Departmental capital expenditure appropriation increased by over \$2 million in 2013/14 for central agencies shared services within the Treasury to support the transition of emergency management functions to DPMC from 1 April 2014. A capital injection was received as assets were transferred from the Department of Internal Affairs and information technology assets supporting the National Crisis Management Centre were replaced. In 2015/16 a capital injection reflects the transfer of funding from the SSC for information technology assets for the Auckland Policy Office and from DPMC for Greater Christchurch Group, which transferred funding from the Canterbury Earthquake Recovery Authority from 1 March 2016.

There is an increase of slightly over \$1 million in 2015/16 and \$700,000 in each of 2013/14 and 2014/15 for the Financial Operation's Business Information Hub, which is the replacement system for the operation of the debt funding and investment portfolio activities.

In 2011/12 departmental information technology assets were transferred from the SSC and the DPMC with the introduction of shared services across the three agencies.

### *Non-Departmental Capital Expenditure*

This appropriation category comprises purchases of debt and equity by the Crown in various Crown entities, and capital additions to the Crown's physical assets.

Changes in non-departmental capital expenditure are principally owing to a combination of:

- transfer of Housing New Zealand Corporation stock to the Tamaki Redevelopment Company as part of the Social Housing Reform Programme at \$1,600 million
- additional investment in Southern Response Earthquake Services Limited of \$250 million for Christchurch earthquake claims settlement
- equity injection of \$6.100 million into Ōtākaro Limited, a Crown entity set up to manage and continue the Anchor Projects Programme and divestment of Crown-owned land in Christchurch, and
- \$142 million of refinancing associated with Housing New Zealand Corporation and Housing New Zealand Limited debt.

Multi-year appropriations also impact with forecasted expenditure for the Loan Facility for Tamaki Redevelopment Company of \$23 million in 2015/16, \$78 million in 2016/17 and \$99 million in 2017/18, and for the Transfer of Anchor Project Assets to Ōtākaro Limited of \$300 million in 2015/16 and \$200 million in 2016/17.

During 2014/15 there was funding of \$333 million provided to support Southern Response Earthquake Services Limited. Payments made in respect of International Financial Institutions' capital funding were slightly over \$34 million in 2014/15 compared to slightly over \$25 million in 2013/14. During 2013/14, \$25 million worth of Redeemable Preference Shares were issued to Solid Energy New Zealand Limited.

### *Multi-Category Expenses and Capital Expenditure*

Changes in the Multi-Category expenses and capital expenditure are due to:

- transfer of funding from Vote Canterbury Earthquake Recovery for the operating and capital expenditure in respect of Anchor projects programme and divestment of Crown-owned land of over \$65 million in 2015/16 and nearly \$204 million in 2016/17
- continuation of the Social Housing Reform Programme during 2016/17 of over \$11 million for 2016/17 and nearly \$18 million for 2015/16
- continued funding of over \$5 million to Inquiries and Research into Productivity-Related Matters during 2016/17, and
- provision of continued funding to the Management of Landcorp Protected Land Agreement of over \$4 million, Management of New Zealand House of over \$16 million and Management of the Crown's Agreement with Taitokerau Forests Limited of nearly \$2 million.

### *Crown Revenue*

Non-tax Crown Revenue largely comprises capital charge, interest from securities and deposits, and dividends from State-Owned Enterprises and Crown Entities, and each of these components is broadly stable.

### *Crown Capital Receipts*

Variances in Crown Capital Receipts are largely due to International Monetary Fund capital returns, repayment of loans, and capital withdrawals from Crown companies.

### *Quality Standards of Policy Advice*

This Quality Standard for Policy Advice sets out the characteristics or dimensions of policy advice that will best enable it to promote well-informed, high-quality decision-making by Ministers. However, the quality dimensions below are not a checklist and not all dimensions will be equally important in every case - judgements are required at the outset about how to apply and balance the quality dimensions to ensure a particular piece of advice is fit for purpose in achieving the result sought.

When undertaking a piece of work, explicit consideration needs to be given to the following:

### *Dimensions of Policy Advice*

Advice Analytically Rigorous (Analysis):	Set in a Wider Strategic Context (Applied Analysis):	Customer-focused and Persuasive (Advice):
Relevant Frameworks:	Strategic:	Clear and well-written
<ul style="list-style-type: none"> <li>• Appropriate analytical frameworks are used.</li> <li>• Appropriate microeconomic, macroeconomic, mathematical and econometric tools are used.</li> <li>• Knowledge is up-to-date and informed by recent thinking and literature in the field.</li> <li>• Assumptions behind the frameworks used are explicit and consideration has been given to how they will be expected to play out in the real world (a world which includes information and transaction costs, bounded rationality, market failure, government failure, etc).</li> <li>• Consideration has been given to less traditional frameworks and whether they would add innovative or useful perspectives.</li> </ul>	<ul style="list-style-type: none"> <li>• Advice is set in the context of the Living Standards framework, the Treasury's outcomes and the Government's broader objectives.</li> <li>• Advice is explicit about the relative importance and materiality of the issue, in fiscal, economic and strategic terms.</li> <li>• Connections across policy issues are made, ensuring that Ministers receive a whole-of-government perspective.</li> <li>• Advice includes consideration of the long-term implications of decisions.</li> <li>• Advice frames issues and help set the agenda.</li> </ul>	<p>Advice is compellingly presented.
