

The Treasury

Earthquake Commission (EQC) Act Review Submissions Information Release

Release Document

January 2018

www.treasury.govt.nz/publications/reviews-consultation/eqc/submissions

Key to sections of the Official Information Act 1982 under which information has been withheld. Certain information in this document has been withheld under one or more of the following sections of the Official Information Act, as applicable:

- [1] 9(2)(a) - to protect the privacy of natural persons, including deceased people;
- [2] 9(2)(b)(ii) - to protect the commercial position of the person who supplied the information or who is the subject of the information.

Where information has been withheld, a numbered reference to the applicable section of the Official Information Act has been made, as listed above. For example, a [2] appearing where information has been withheld in a release document refers to section 9(2)(b)(ii).

In preparing this Information Release, the Treasury has considered the public interest considerations in section 9(1) of the Official Information Act.

New Zealand's Future Natural Disaster Insurance Scheme

Proposed changes to the Earthquake
Commission Act 1993

Submission Form

July 2015

THE TREASURY
Kaitohutohu Kaupapa Rawa

New Zealand Government

New Zealand's Future Natural Disaster Insurance Scheme Proposed changes to the Earthquake Commission Act 1993

Your responses

Please write your response in the template below.

Please note:

- ▶ you **do not** need to answer all sections – just the ones where you have information you would like to contribute
- ▶ please expand or delete boxes as you need to but **do** keep the original question numbers.
- ▶ please **do not** send us reports or other documents but **do** include references or links to supporting evidence or information
- ▶ please submit your response to Submissions.Eqcreview@treasury.govt.nz by 5.00pm on Friday 11 September 2015.

Thank you for your time and effort in making your submission.

Official Information Act 1982

Submissions are subject to the Official Information Act 1982 (OIA). Please set out clearly with your submission if you have any objection to any information in the submission being released under the OIA, and in particular, which part(s) you consider should be withheld, together with the reason(s) for withholding the information.

Grounds for withholding information are outlined in the OIA. Reasons could include that the information is commercially sensitive or that you wish personal information, such as names or contact details, to be withheld. An automatic confidentiality disclaimer from your IT system will not be considered as grounds for withholding information.

We will take your objections into account when responding to requests under the OIA.

Any personal information you supply in the course of making a submission will be used by the Treasury only in conjunction with the matters covered by this document. Please clearly indicate in your submission if you do not wish your name to be included in any summary of submissions that we may publish.

Your contact details

For individuals

Your name:	[1]
	Indicate here if you do not wish your name to be included in any summary of submissions that we may publish.

Email address:	[1]
Phone number:	

What city, town or province do you live in?	Christchurch
Do you own your own home?	Yes

For organisations

What is the purpose of the EQC scheme?

Proposal for discussion

1 That the purpose of the EQC Act be to establish a Crown-owned natural disaster insurance scheme for residential buildings in New Zealand that:

- ▶ supports, complements and is closely coordinated with the provision of effective private insurance services to the owners of residential buildings
- ▶ recognises the importance of housing in supporting the recovery of communities after a natural disaster
- ▶ supports improved resilience of New Zealand communities and an efficient approach to the overall management of natural hazard risk and recovery in New Zealand
- ▶ contributes to the effective management by the Crown of fiscal risks associated with natural disasters.

What do you think?

1a Do you agree that these purposes are appropriate and complete?

Yes

1b If not, what changes would you suggest, and why?

What types of perils will EQC cover?

Proposal for discussion

2 That EQC continue to insure against the following perils: earthquake, natural landslip, volcanic eruption, hydrothermal activity, tsunami, and storm and flood (with, in the case of storm and flood, only residential land being covered).

What do you think?

2a Do you agree that EQC should continue to provide cover against the same perils as it currently does?

Yes

2b If not, what changes would you suggest, and why?

What types of property will EQC insure?

Proposal for discussion

3 That EQC building cover continue to be available to residential buildings and dwellings in non-residential buildings.

What do you think?

3a Do you agree that EQC building cover should continue to only be available to residential buildings and dwellings in non-residential buildings? Yes

3b If not, what forms of accommodation or living arrangements do you think should be added or removed, and why?

Proposal for discussion

4 That EQC land cover only be available for land associated with residential buildings. Therefore, dwellings in non-residential buildings would not receive any EQC land cover.

What do you think?

4a Do you agree that EQC land cover should only be available for land associated with residential buildings?

Yes

4b If not, what coverage of land cover would you prefer, and why?

Extending building cover to include more siteworks and main access way

Proposal for discussion

5 That EQC building cover be extended to include siteworks and the main access to the building.

What do you think?

5a Do you agree that EQC building cover be extended to include siteworks and the main access to the building? No

5b If not, what do you think should be done instead, and why?

The current demarcation between siteworks incl main access and buildings is easily understood. If EQC is to cover siteworks beyond the building it should apply to the entire site for simplicity.

EQC to no longer provide contents insurance

Proposal for discussion

6 That EQC no longer offer residential contents insurance.

What do you think?

6a Do you agree that EQC should no longer offer residential contents insurance?

Yes

6b If not, what level of contents cover do you think EQC should offer, and why?

6c For insurers, what do you anticipate the impact would be on premiums your company charges for residential contents insurance, if EQC no longer offered residential contents insurance?

Please note the information in section 1.4 regarding the Official Information Act.

How much insurance will EQC offer?

Proposal for discussion

7 That the monetary cap on EQC building cover be increased to \$200,000 + GST.

What do you think?

7a Do you agree with the proposed increase in the building cap to \$200,000 + GST?

The level of cover should only be increased if EQC is organised in such a way that it deals only with the insurer and not the public. See below for an explanation.

7b If not, what cap would you prefer, and why?

7c Do you have strong views on the merits of a \$150,000 + GST cap versus a \$200,000 + GST cap?

7d If so, what are they?

7e For insurers, what do you anticipate the impact would be on premiums your company charges for residential property insurance, if the proposals in this document regarding changes to building cover were implemented? Please provide this information for a monetary cap for EQC building cover of both \$150,000 and \$200,000.

Please note the information in section 1.4 regarding the Official Information Act.

Reinstatement of EQC cover after an event

Proposal for discussion

8 That EQC building cover reinstate after each event.

What do you think?

8a Do you agree that EQC cover should reinstate after each event? If not, what is your preferred alternative, and why? Yes

8b Do you agree with retaining the current definition of an event?

Yes

8c If not, what is your preferred definition, and why?

EQC land cover

Proposal for discussion

9 That land cover be limited to situations where the insured land is a total loss meaning it is not practicable or cost-effective to rebuild on it.

What do you think?

9a Do you agree that the proposed enhanced building cover, combined with restricting land cover to situations where the site of the insured building cannot be rebuilt on, would resolve, for future events, many of the recent difficulties with the interaction between land and building cover?

No

9b If not, what is your preferred alternative, and why?

The status quo

9c Do you agree that restricting land cover to situations where the site of the insured building cannot be rebuilt on is appropriate, given the EQC scheme's focus on providing homeowners the resources to repair, rebuild or re-establish homes elsewhere?

No

9d If not, what is your preferred alternative, and why?

If EQC is in effect an insurer with a cover of \$100k or \$200k then it must cover land issues as the costs of rebuilds or repairs will be effected by the land damage

9e Do you have any concerns regarding the proposed change to the configuration of building cover in light of the move by most insurers to provide sum insured home insurance policies?

9f If so, what is your preferred alternative, and why?

Better aligning EQC and private insurers' standard of repair

Proposal for discussion

10 That EQC's current statutory repair obligation already appears broadly consistent with industry practice.

What do you think?

10a Do you agree with the Government's assessment that EQC's legislated standard of repair is broadly consistent with current industry norms? No.

10b If so, do you have views on why EQC's standard of repair is seen as markedly different from current insurance industry norms? EQC's policy of substitution of materials is in practice different from private insurers. EQC have stated to me that their repair strategy is different from my insurer – I have a standard IAG policy. In practice, repairs under the EQR program used the MBIE guidelines eg in regard to levels as the target tolerances. This is not accepted under the IAG policy.

10c If not, do you have suggestions for reforms that you consider would move the EQC standard of repair closer to current insurance industry norms for residential property? Better guidelines with the Act that align the definition of the repair obligation closer to the industry standard for replacement in terms of materials and

quality of work.

Simplifying EQC's claims excess

Proposal for discussion

11 That EQC has a standard claims excess of \$2,000 + GST per building claim.

What do you think?

11a Do you agree that EQC's building claims excesses should be standardised and simplified to a flat dollar amount?

No

11b If yes, do you agree that \$2,000 + GST is the appropriate claims excess on building claims?

11c If not, what would you prefer, and why?

A minimal level say of \$200. Minimum excesses are simply there to deter minimal claims. If EQC is involved the claim is almost certainly significant and disaster related. In the Christchurch case the collection of any excess is going to be difficult in the context of the disaster.

Proposal for discussion

12 That EQC have no claims excess on land claims.

What do you think?

12a Do you agree that EQC should have no claims excess on land claims?

Yes

12b If not, what would you prefer, and why?

Regularly reviewing main monetary settings of cover

Proposal for discussion

13 That the EQC Act require monetary caps, premium rates and claims excesses on EQC cover to be reviewed at least once every five years.

What do you think?

13a Do you agree that monetary caps, premium rates and claims excesses on EQC cover should be reviewed at least once every five years?

Yes

13b If not, what alternative would you prefer, and why?

How will homeowners access EQC insurance cover?

Proposal for discussion

14 That EQC cover continues to automatically attach to fire insurance policies on residential buildings, as defined in the EQC Act.

or

15 That EQC cover automatically attach to insurance policies on residential buildings, as defined in the EQC Act, on a peril by peril basis; so if a peril covered by EQC is excluded from the private policy, it is also excluded from the EQC cover.

What do you think?

14a Do you agree that EQC cover should continue to automatically attach to fire insurance policies on residential buildings? Or

Yes

15a do you agree that EQC cover should automatically attach to insurance policies on residential buildings, and EQC cover should exclude any natural disaster peril that is excluded from the fire insurance policy it attaches to?

15b If you do not agree with either of these options, what alternative arrangement do you prefer, and why?

Proposal for discussion

16 That EQC continue to have the ability, but not the obligation, to directly provide EQC cover to homeowners who request it.

What do you think?

16a Do you agree that EQC should continue to be able, but not be obliged, to directly provide EQC cover to homeowners who request it?

No

16b If not, what alternative arrangement would you prefer, and why?

The cover if related to fire insurance will provide a high level of cover in NZ

Who will handle EQC claims in future?

Proposal for discussion

17 That all EQC claims be lodged with claimants' private insurers.

What do you think?

17a Do you agree that EQC claimants should be required to lodge all EQC claims with claimants' private insurers?

Yes. I strongly agree. EQC is fundamentally unable to develop quickly an adequate organisation to handle a disaster such as Christchurch. It did not have the culture or personnel for customer focus and never will at the outset of a disaster. It would have been far better if the private insurer was the point of contact and that EQC liaised with them to determine the EQC obligation. If they disagreed then there should be discussions between them that do not involve the insured. Many of the problems with EQC [and are continuing] relate to its lack of culture of customer focus its inability to properly interact with the customer, logically explain its position and

consequently EQC gets into absurd situations. EQC has been and continues to be a constant source of frustration to Canterbury people. I have settled over \$100 million of commercial settlements with private insurers and the level of dialogue, explanation and professionalism is far higher than EQC.

17b If not, what alternative arrangement would you prefer, and why?

See above for an explanation. EQC would be better served being a “backroom” dialogue between the insurers and EQC. The customer should only have one party to deal with. EQC would not need to grow suddenly to cope with the customer interface. Instead EQC could focus on developing the expertise to ensure that their obligations are met.

Deadline for reporting claims

Proposal for discussion

18 That the current three-month time limit for claims notification be retained, but EQC be able to accept claims up to two years after an event, unless doing so would prejudice EQC.

What do you think?

18a Do you agree that the current three-month time limit for claims notification should be retained, but EQC should be able to accept claims up to two years after an event, unless doing so would prejudice EQC?

Yes

18b If not, what alternative arrangements would you prefer, and why?

Ensuring the scheme meets its expected costs

Proposal for discussion

19 That the new EQC Act contain pricing and transparency principles requiring the scheme to adequately compensate the Crown for its expected costs and risks.

What do you think?

19a Do you agree that the new EQC Act should contain pricing and transparency principles requiring the scheme to adequately compensate the Crown for its expected costs and risks?

19b If not, what alternative arrangements would you prefer, to ensure the scheme’s future financial sustainability, and why?

Allow but do not require differentiated EQC premiums

Proposal for discussion

20 That the current legislative flexibility to charge flat-rate or differentiated EQC premiums be retained.

What do you think?

20a Do you agree that the current flexibility to charge flat-rate or differentiated EQC premiums should be retained?

Yes

20b If not, what alternative arrangement would you prefer, and why?

20c Do you agree with the Government's intention to continue charging EQC premiums at a universal flat rate?

How will EQC finance its risk?

Proposal for discussion

21 That the Natural Disaster Fund be retained in broadly its current legislative form.

What do you think?

21a Do you agree that the Natural Disaster Fund should be retained in broadly its current legislative form?

Yes

21b If not, what changes would you like to see considered?

Proposal for discussion

22 That the Act enable EQC to use other forms of risk transfer, in addition to traditional reinsurance.

What do you think?

22a Do you agree that the Act should enable EQC to use other forms of risk transfer, in addition to traditional reinsurance?

Do you have any other feedback?

Other feedback

23a Are there any issues not discussed in this document that you would like to bring to the Government's attention at this stage?

I reiterate that EQC did/does not well serve Canterbury after the earthquakes. It fundamentally did/can not establish an effective customer focus, does not have the ability to clarify its' position on repairs, nor does it adequately answer the reasonable questions put to it by the insured. The interface between EQC, the insured and the insurer frequently results in a three way argument.

23b What submissions would you like to make on those issues?

To simplify the above comments the insured should only need to deal with their insurer. EQC and the insurer should be able to agree their demarcation without impacting the insured or delaying repairs. I strongly believe this scenario would reduce the arguments & difficulties experienced in Canterbury for future events.
