

Errata – International freight transport services inquiry

Last updated 8 October 2012

This document records factual inaccuracies or publication errors in the Commission’s freight inquiry. The Commission assesses the impact of each entry in this document and, where warranted, ensures other parties are informed of corrections. In large part, any such errors are likely to be in the detail and not material to the Commission’s findings and recommendations – but nonetheless important to correct.

It is important to emphasise that these entries relate to ensuring inquiry documentation is factually accurate *at its time of completion*; ie, based on information *at the time* and not new information.

The Commission regrets inaccuracies and errors and considers it important to publish such corrections in the interests of transparency, fairness to parties concerned, and to ensure future research that references the Commission’s work does not repeat the inaccuracies or errors. For that latter reason, the Commission has highlighted, in its main documentation, when this errata should be referred to for relevant information to be considered in entirety.

Final report, Appendix F Stevedores and marshallers at New Zealand ports

Table F.1 Stevedores and marshallers at New Zealand ports

Corrections (highlighted) to organisations shown as providing stevedoring and marshalling services at different New Zealand ports.

Port	Stevedoring and marshalling providers – container cargo at container terminals	Stevedoring and marshalling providers – non-container cargo ¹
